

I am writing to support that the FCC should not implement any proposal that would lessen Indiana's Telephone Privacy law protections. Indiana's Telephone Privacy Law has improved my time at home with my family making our home safe and free from unwanted phone calls during the dinner hour and all day. We used to receive at least 3 to 4 calls a day, but now only receive 2 or 1 a week. I personally would not want to see these rights for privacy taken away from Indiana residents. I again uring you to not implement any proposal that would lessen what this fantastic telephone privacy law has done.
